

About L M Equipment

LM Equipment & Design manufactures truly productive, rugged, coil processing components. We have a full service manufacturing facility with in-house engineering, machine and assembly departments, and an expert technical staff to design and manufacture a wide range of coil processing equipment from a single line component to a complete line. The best way to show our leadership is through practical problem solving capabilities and profitable performance.

L M Equipment is dedicated to designing and building machinery and systems that meet the steel industries most exacting standards and hard use. L M's classic manufacturing methods and ultra rigid construction provide exceptional value.

4 Arm Entry Turnstile Designed By L M Equipment & Design

Standard Entry Turnstile Features:

- ◆ Capacity up to 80" OD x 80,000 #, 84" wide
- ◆ Timken or Rotek bearing designs
- ◆ Options include: positioning stops
- ◆ Hydraulic powered rotation with gear & pinions
- ◆ One to four arm designs, arms will accept "C" hook loading

Whether you need a standard coil processing line component, or a complete line, L M Equipment has the capability to design it, build it, deliver it on time, and get it operating efficiently within established budget parameters. Each component we develop becomes a pre-engineered, performance proven product to maximize your present processing facility, or for use in future lines. The technical staff at L M Equipment is ready to help you. Please contact us.
